

MASDAR CITY

A place where businesses can thrive and innovation can flourish, Masdar City is a modern Arabian city that, like its forerunners, is in tune with its surroundings. As such, it is a model for sustainable urban development regionally and globally, seeking to be a commercially viable development that delivers the highest quality living and working environment with the lowest possible ecological footprint.

View of the facade at Masdar Institute, Masdar City It is a community where cutting-edge cleantech research and development, pilot projects, technology testing, and construction on some of the world's most sustainable buildings are all ongoing. As such, Masdar City offers a fertile environment that inspires creativity and growth to organizations operating in this strategic and dynamic sector.

As an emerging hub and a magnet for talent, financial capital and entrepreneurship in the fast-evolving renewable energy and cleantech industry, Masdar City provides a unique competitive advantage to companies, other organizations and ancillary service providers operating in, and serving this sector.

As an industry cluster, the city creates a dynamic, vibrant, international and entrepreneurial community that offers numerous benefits, including potential access to capital, a critical mass of sector knowledge, a large pool of high-quality talent, and a launching point into local, regional and international markets.

Significantly, Masdar City serves as an open technology platform that gives partner companies an unmatched opportunity to develop, test and validate their technologies in a large scale, real-world environment – and in particular, with consideration to the region's climate conditions and consumption patterns

Areas of Focus

In light of its climate and geography, Masdar City will focus on attracting firms and pursuing research in four primary areas of the cleantech industry: solar, green building, water, and power storage, and secondarily in the areas of smart grids, efficiency appliances, electric vehicles and waste.

More specifically, companies and organizations looking to set up in Masdar City should identify which specific sector(s) in which they will operate:

- ☒ Energy Generation
- ☒ Energy Storage
- ☒ Energy Transmission and Distribution
- ☒ Energy Efficiency Equipments
- ☒ Air and Environment
- ☒ Water and Waste Water
- ☒ Recycling and Solid Waste
- ☒ Transportation
- ☒ Green Building
- ☒ Regional Headquarters
- ☒ Consultancy
- ☒ Organic Products
- ☒ Non-Profit Organization
- ☒ Cleantech and ICT
- ☒ Marketing
- ☒ Business Information
- ☒ Human Resources Development
- ☒ Service Providers

Types of Operating Licenses

Incorporation, which is essential for partner companies, is possible as one of three types of companies:

- A branch of a foreign company or UAE-based company (including companies incorporated in other UAE special economic zones)
- A special economic zone limited liability company with corporate shareholders
- A special economic zone limited liability company with individual shareholders.
